

4-20 mA Vibration Transmitter, Top connector

Main Characteristics

- Low Cost velocity version with limited bandwidth 10 Hz to 1000 Hz. Can monitor machine as low as 500 RPM.
- Low Cost MEMs technology with limited 40 g peak dynamic range.
- Dynamic (acceleration or/ Velocity) output available
- Temperature output available (10 mV/°C)
- Submersible version down to 150 metres available with integral polyurethane and FEP cable.
- Life time hermetic sealing warranty with M12 & Mil glass seal connector
- ISO 10816 (or new ISO 20816) compliant.

Competitive advantage

- Price
- Resistant to shock (magnet mounting)
- ESD and reverse wiring protection.
- The glass seal hermetic connector protects the electronic from harmful environmental influences, significantly increasing their reliability and lifetime. Associated with low cost IP68 overmolded M12 cable assembly it is a perfect solution for harsh environment.
- M12 connector (4-Pin) offers compatibility with numerous sensors used in automation.
- Large choice of integral cable with stainless steel overbraid or conduit.

Description

The 4-20 mA loop powered industrial accelerometer model 425.01 is designed to monitor the vibration in harsh industrial environment. It uses the industry standard 2-wire 4-20mA Loop that interfaces directly with PLC, DCS and 4-20mA monitor. Large choice of output (Velocity, RMS, equivalent Peak) and frequency range will help to fit almost every customer requirements. Their compact size allows for installation in tight places. The dynamic signal output (acceleration) can also allow spectral vibration measurements.

Pay attention that low cost capacitive MEMs acceleration / vibration sensor could lead to false trip if acceleration superior to 40 g peak are presents in the 5 kHz region. If such event happen model 425.51 is recommended.

Model 425.01-AAAA-3 shown

Typical applications

Vibrations measurement in the rugged environments of industrial machinery monitoring. It allows continuous trending of overall machine vibration.
